Eschew, and banish from thy brest,
thought, care and fearefulnes:
These hurt the heart, they drie the bones,
and natures strength oppresse.

Ade-

A description of the foure Quarters of this
 yeare 1608. And first of the Winter
 Quarter. *Sol in ♊. 23. X.*

The Winter quarter, wherewith we usually begin the yeare,
 (according to our English Computation) made entrance in
 the yeare aforesaid going, the xii. day of December: at which
 time, the Sunne (by his incessant motion) had gotten him-
 selfe into the farthest limits of his Southerne declination:
 which happened at his first entrance into the first scruple of ♑ cold
 and earthy signe Capricorne; the onely and naturall House of male-
 volent Saturne. The Sunne at that instant, being fallen farthest
 from our Zenith, making with vs then, the shortest day, and longest
 night: which dureth until he hath finished his restless course through
 the three last Signes of the Zodiacke, concluding with the last mi-
 nute of Pisces.

This part of the yeare, inclinably is cold and moyst, answering
 to the complexion of old men, & agreeable to the element of water;
 working in and vpon our bodyes, sicknesses and diseases of like qua-
 litye to it selfe, whereupon Rheumes and Poles, Catarrhes, Wat-
 ring of the eyes, and such other, are like at this time, to afflict and
 molest vs.

Of the Spring. *Sol in ♈. 8. ii.*

The Spring beginneth this yeare the xi. day of March, when as
 the Sunne entred into the first minute of the equinoctiall signe
 Aries; a Signe of the fire triplicity, the naturall house of Mars,
 and the exaltation of Sol: and is of qualitye, hot and moyst, resem-
 bling the ayrie Element, and (as Hippocrates sayth) is the best time
 to take Physicke, and to Purge the bodye.

The Diseases comming in this season, are like to be Squinancies,
 Apostumatio: s in the throte and necke, subdaine Swellings, Plu-
 ries, Suffrag in the breast, Inflammation in the stomacks. Ache in
 the Joynts, chiefly in the Knees and Fete; with many other: but
 one may Superledeas all: which God forbid.

Of Sommer. *Sol in ♋. 21. ii.*

Sommer, the third part of this Astronomicall yeare, doth begin
 the xii. day of June, the Sunne then entring into the first point of
 the Signe Cancer, where he maketh the Sommer Solstice; and hath

his greatest declination to the North from the Equinoctiall line; and then is our longest day, and shortest night.

This season (according to his proper nature) is hot and dry; compared to the Element of Fire, and complexion of Chollicke. and differeth greatly both from the Spring and Winter, and also from the Haruest season; and is a more dangerous time then the two former, for the Sickneses hercof are more desperate: and if they be not deadly, yet their continuance is the longer. The Griefes then like to happen, are Inflammation of the Blood, causing great distemperature in the Head, Brain, Sight, and Heart: also in the Reynes, Loynes, Backe, and Bladder: and the same most to molest persons of middle age.

Of Haruest, or Autumne.

Solin \simeq m 7.

The Haruest quarter, called also Autumne, being the fourth, and last Quarter of this yeare, doth begin the xiiij. day of September, when as the Sunne doth enter into the signe Libra; making the second Equinoctiall, the day and night int of equall length.

This Quarter is naturally cold and dry, agreeable to the Melancholy complexion, and earthy Element. The Diseases which in this season are most like to infect vs, are these: stuffing of the Breast and Stomacke, obstruction of the Luer, Infection of the Ventricle, great griefes in the Backe, Reynes, and Loynes: From which, and from all other our deserved punishments, O Lord Defend vs.

Phisicall obseruations.

Hippocrates defineth Phisicke, to be a putting too, and taking away, of such thinges as are wanting, or abounding in mans body: The former hercof, standeth in dieting of the body: the other, in disburdening the same of corrupt & superfluous Humours: which is best effected by Blood-letting and Purging. The best times for doing whercof (according to the Rules of Astronomie) are herce briefly notified.

Let Blood the Sanguine, in humours mixt or simple, the Moone being placed in γ , \simeq , \uparrow , \times , δ , m , and π , in a Sextile \angle , or \square , betwixt \uparrow and γ .

Of the Cycle of the Keyes of the Fiue moueable Feaſtes, *Septuageſima*, *Quadrageſima*, *Pascha*, *Rogationes*, and *Pentecoſt*: and how the partes thereof are to be framed through-out their whole Cycle.

This Cycle of the Keyes is completed (like as the Cycles Decennouenal and Epacticall) in 19. yeares of the Sunne: the ſeueraſl numbers wherof are yearly changed, and to be made, as followeth. When the Golden Number is 1. the Clauis of that yeare (being the firſt of the Cycle) is to be framed of the number of 19. (for the 19. yeares of the Decennouenal Cycle) and of the number of 7. (for the 7. dayes of the weeke. which added together, make 26. which ſhall be the Clauis for that yeare. To 26, the Clauis of that yeare, adde 19. and the reſult will be 45. from which take 30. (for as often as any two numbers thus to be conſoynded, ſhall amount vnto 40, or aboue) you muſt alwayes deduct 30.) and then will remaine 15. for the Clauis of the 2. yeare: to 15. the Clauis of the 2. adde 19. and it will make 34. which ſhall be the Clauis of the 3. yeare: And ſo (conſequently) by adding of 19. to the Clauis of the former yeare, and ſubſtracting 30 as aforeſayd, all the (through-out their whole Cycle, will appeare, and affront them ſeuers, as in this Table is ſhewed.

When as this Cycle is all runne out, you may (for the Golden number and Keyes) simblably renew it, and so infinitely.

The vse of the Clauēs.

The ancient Computistes learned the seuerall numbers of this Cycle (Clauēs) Keyes: because, that as Keyes do pleasantly open and shut the Lockes for which they are made: so these Numbers do readily shew the finding out of the Feastes. The practise thereof, is thus: Looke out (in the founner Table) the Golden number of the yeare, where you would know the Feastes, and you shall find the Clauis of the same yeare thereunder directly placed: marke how many ones be in the number of that Clauis, then seeke in the Kalender for the day, where againe the Clauis of the Feast you seeke for, standeth, and there begin to tell 1. 2. 3. and so reckon on downewardes (in the Kalender) so many dayes, as there be ones in the Clauis, and the day wherupon the last part of that Clauis endeth, is called Terminus festi, the limit or utter-bound of the Feast, that you seeke for; and the next Sunday after, shall be the Feast day: For Terminus Festi, and the Feast it selfe, do neuer fall out vpon one day: as appeareth by this Rule in Ioan. de sacro Bulto.

Terminus et Festum nunquam celebrantur ibidem,

Lux tene at Domini post termin. proxima Festum.

The Terme and Feast, may neuer both, fall out vpon a day:

The Sunday next after the Terme, must be the Feast alway.

Example.

To finde out Easter, this yeare 1608. by the Clauis, I looke in the fowrday Table, for the Golden number of this yeare, which I finde to be 13. and the Clauis (there-vnder placed) to be 14. and the Dominicall letters (because it is Annus Hyperbolicus, to be C. B. that is to wit, C. to seme untill the 28. of Februarie, and B. for all the yeare after. Then I looke in the Kalender for Clauis Pasche, whiche I finde seate against the 11. day of March; that 11. day, I begin to reckon for 1. & the 12. for 2. and so I tel downewardes till I

come to 14. which I finde to end vpon the 24. day of March (being Thursday) which day is Terminus Paschæ: then I looke in the Kalender for the next Dominicall letter for this yeare: which I finde to be B. and the same to fall out vpon the 27. day of March, where by I find Easter (Sunday, to be the 27. day of March, for this yeare.

Certaine Cautions touching the vie of the

Clauis in the Leape yeare.

In seeking out of Septuagesima & Quadragesima you must ad 1. to the Clauis. These two Feastes, Septuagesima and Quadragesima, are to be taken by the fourth solar Letter: and Pascha, Rogationes, and Pentecost, by the latter. If Quadragesima fall out vpon, or after the 24. day of February, then it is to be set one day backward.

Why the Church keepeth the memoriall of these

Feastes, and why they are called Mouable.

Septuagesima is so called, because it containeth 70. dayes: For it beginneth, A dominica in qua cadit Alleluia, and is extended, ad diem dominicam in Albis. The Church celebrateth this Feast, in remembrance of the 70. yeares wherein the Children of Israel liued in Captiuitie in Babilon. The first Sunday in Lent is called Quadragesima, because that from this Sunday, vique ad eam dominici, are contained 40. dayes: and the celebration of this Feast is kept, as a memoriall that Moses fasted 40. dayes, when he receiued the Decalogue: Or els, because Christ fasted 40. dayes, and ouercame the temptations of the Diuell. Pascha (sayth S. Hierome) hebraice dicitur Phase, non a passione (vt plerique arbitrantur) sed a transitu, nominatur: because the Destroyer seeing the Blood vpon the Dore- postes of the Israelites, passed by and stroke them not. The Church solemnizeth this Feast, in remembrance that Christ dyen and rose againe, and ther: by passing from death to life, made (as noteth S. Augustine) a way for vs, that beleue his resurrection: that we also may passe from death to life, according to the saying of our Lord:

A Prognostication.

Lord: Qui credit in me, tranſit a morte ad vitam. Iohn. 5.

The Sunday next going before Rogationum ieiunia, is commonly called Rogation Sunday: for that the Church (at this time) was wont to use Proceſſions, and (therewith) Prayers of thanks giving to God, for the Fruits then growing upon the earth, with interceſſion for the further bleſſing thereof, to perfect ripenes, for mans behoofe. Some ſuppoſe that theſe Proceſſions (now called Perambulations) were uſed yearly, for the better continuance of the knowledge of the limits and outboudes betweene pariſh & pariſh. Penticoſt, is as much to ſay, as: the ſpace of 50. dayes: becauſe that betwene Eaſter ſunday and Whitſunday (incluſively there are 50. dayes. The Church continueth the ſolemnitie of this Feaſt, in remembrance of the Law given by God to Moſes vpon the ſierie Mountaine, on the ſixtieth day after the departure of the Children of Iſrael out of Egypt. And for that the Holy Ghoſt (in viſible ſigne of Fierie tongues) came downe (as on this day) vpon the Apoſtles. This day was called (in the language of our great Graundfathers) **Whitſunday.**

Why theſe Feaſtes are ſayd to be moueable.

Theſe Feaſtes are tearmed **Moueable**, becauſe they follow the pꝛimations & courſe of the Moone, and therefore haue not (antiently) any fixed or ſtanding place in the Kalender. The reaſon hereof is, for that theſe Feaſtes are alwayes to be kept on the Lords day (commonly called Sunday:) and becauſe one & the ſelfe ſame Lette is not alwayes to ſtand (in the Kalender) for Sunday: partly, becauſe the ſolar yeare, conſiſting of 365. dayes & 6. houres, being made Hebdomaticall (that is, deuided into 52. weekes) there remaineth one odde day: partly, becauſe thoſe 6. houres put together euery fourth yeare, doe make Diem intercalarem, which cauſeth the Leape yeare: therefore theſe Feaſtes can not continually fall vpon one certaine day of the Moonth, like as the other Feaſtes (ranging ouer all the dayes of the weeke) ordinarily doe: which therefore are called **Fixed, or ſtanding Feaſtes.**

Of the difference betweene the fixed and moueable Feaſtes.

Iohn Steffler (the Phoenix of Astrologians of his time) in Calend. Rom. prop. 31. ſergeth downe this difference, betweene the fixed
and

and moueable Feastes. The fixed, or standing Feastes (sayth hee) Nullum continent in se mysterium, aut sacramentum, but onely continue the remembrance of a thing on that day done. But the moueable Feastes (ouer and aboue the memorie of a thing done) habent in se mysterium aliquod; so that besides, that they also beare the type or figure of a thing past, or to come. The day of Christ his Natinitie, poynteth at nothing to come, but sheweth onely, that Christ on that day (videlicet, the xxv. day of December) was borne, non ergo celebratur ob sacramentum: But the Feast of Easter, ouer and besides a thing on that day done (Hoc est, immolationem agni eo die factam) habet in se arcanum et sacramentum, because it was a figure of a thing to come: namely, the offering vp of Christ his most blessed body vpon the Crosse, for the redemption of man kind; and a representation of a thing past, to wit, the deliuerance of the Children of Israel out of Captiuitie vnder Pharo in Egypt. Of the difference of these Feastes (much like to this effect) writeth S. Augustine lib. 2. ad inquisitiones Ianuarij, cap. I. et 2. So doth S. Hieron. also, in Epistola de celebratione Pasche.

Corollarium.

- 1 To these moueable Feastes, may be added Ascension day, which is alwayes the Thursday next after Rogation Sunday.
- 2 Corpus Christi day, which is the Thursday next following Trinitie Sunday.
- 3 Aduent Sunday, which is alwayes, the fourth Sunday before Christmasse day, and is yearely altered according to the diuersity of the Dominicall letter: For when B is Dominicall letter, Aduent Sunday shall be the 27. of November: which is the farthest it may go from Christmasse: When C, the 28: When D, the 29: When E, the 30. of November: When F, is solar letter, Aduent shall be the 1. of December: when G, the 2: when A, the 3. day of December: and this is the nearest it may goe to Christmasse.

*Quis scit an adyctant hodierna crastina summa
tempora dy superi Horat.*

The Sunne, the Moone, & every Star: the change of night & day.
All tell vs, that this mortall life, doth swiftly pass away:
Redeeme the time therefore, and still to godly exercise
Addict thy selfe: and solenes detest in any wise.
The standing Poole affordeth fish, more then the running flood:
And in an idle minded man, there growes but little good.
While day doth last, prouide for Oyle, thy Lampe to satisfie:
at night time (when thy hyde-groome knocks) it will be too late to bie
And the roote of every Tree, the fatall Ace is put:
Addicted still to strike thereat, the same downe for to cut.
And every Tree that yeeldes no fruite, when God shall it require:
Shall suddenly be heaued downe, and cast into the fire.
While time of mercy yet doth last, Gods mercy still desire:
The day of iudgement hasteth on, which is a day of fire.
Looke in what state thou standest in, when that thou diest heere:
In the selfe same, before the seate of God, thou shalt appeare.
For looke what way so euer that, the Tree to earth doth fall,
(So Christ hath sayd, beleue it well) there still remaine it shall,
Thy sinne, thine end, the death of Christ, thy eternall paines of hell;
the day of doome, the toyes of heauen, these fixe remember well.
